

Continuing Competence Program

CCCP learning in action

Section 7

Tracking Other Learning

TRACKING OTHER LEARNING

The CCP is based on the principle that registered nurses continually learn and participate in learning activities. During any year, you will take part in other learning activities that you did not include in your CCP Learning Plan. The *Tracking Other Learning Worksheet* is designed to help you keep track of these additional learning activities for your information.

- This worksheet is a supplemental tool that will not be viewed by anyone other than you.
- Other learning activities might include in-services or professional development activities in an area not identified as a focus in your *Self-Assessment Worksheet*.
