

Globalization:

its impact on nurses & health systems

Workshop objectives

- To consider the contribution of nurses in Canada and around the world to health systems.
- To share our experiences and increase our knowledge of the impact of the global economy on nursing and health systems.
- To explore ways in which our local experiences are shared by nurses across Canada and around the globe.
- To identify actions we can take to promote equity in nursing and health systems at the regional, national and global level.
